please note this is a key takeaways and analysis of the book and not the original book start publishing notes summary analysis and review of malcolm gladwell s outliers the story of success includes a summary of the book review analysis key takeaways and detailed about the author section preview malcolm gladwell s outliers the story of success argues that success is not solely the result of merit and hard work rather gladwell says extremely successful people are successful because they were in the right place at the right time or because they received crucial help in order to understand success it is important to look not at the characteristics of the individual but at the social and cultural factors that enable success sports are often seen as a uniquely meritocratic endeavor people believe that the most physically talented athletes are the most successful however this is not true in fact in canada children whose birthdays fall just before the cut off date for participation in youth leagues have a huge advantage these children are the oldest ones in their leagues and so are most developed and are stronger and faster than their peers in canada this means that they are chosen to move into more advanced teams and leagues and so get more practice and training as a result almost all professional hockey players in canada have birthdays clustered around the dates just before the youth league cut offs the professional players all have great talent and all work hard however what truly made them outliers was not work or skill but the accident of their birthdays

about the book the world of the tipping point is a place where the unexpected becomes expected where radical change is more than possibility malcolm gladwell s the tipping point how little things can make a big difference is an irreverent fresh look at why some things

become trends and others don't we are all familiar with and a part of trends fads and cultural shifts but often we don't understand them it's easy to understand why specific things happen in our own lives but most of us just stare off into space and shake our heads when we happen to think about why some shirt is in style or why a neighborhood is getting more dangerous we don't know because there are too many moving parts to think about in this book gladwell zooms in on the relatively microscopic people aspects and conditions that spread those trends he uses the overarching metaphor of an epidemic as a visualization of how ideas spread do you know why suddenly some video of a little kid is everywhere on the internet or why harry potter became the most popular book in the world malcolm gladwell thinks he does for most of us trends and ideas are just things that happen around us much of what gladwell is doing makes causes and effects that are too big to think about more human and personal in that way he gives us something to grab hold of it's as if he is taking massive spreadsheets and computer models of information and explaining them to you at a cocktail party over a martini it works and he makes a lot of sense sitting there reading it over you'll think yeah of course i already knew that which is always the mark of a good explanation of course it's impossible to ever know for sure why one fad happens and another doesn't make it out of the gate but by the end of the book gladwell has drilled down into the minutiae and created a compelling breakdown on how it generally works we all understand things that we've never put into words quite succinctly gladwell is doing exactly that in this book the strength of his pop science is that he gives concrete names to nebulous causes that create our world excerpt from the book the tipping point grew out of an article i wrote as a freelancer for tina brown at the new yorker who ran the piece and then to my surprise and delight hired me thank you tina malcolm gladwell is a prolific writer who lives in new york his books and articles generate a lot of conversation and debate because they dig into highly contentious and often unanswerable issues he is a special contributor to the new yorker magazine where he writes about things like the science of cool hunting race and sports physical genius the concept of moral hazard and health care and the difference between puzzles and mysteries he has published several popular books including blink and outliers his articles and books are often called pop science because he takes research rearranges it and uses it to draw new conclusions about why things happen in our world most often his topics are questions that can't be definitively answered or investigations of concepts that are unresolved while being somehow both common and mysterious his writing is widely read and his breakdown of the tipping point concept has been widely referenced and utilized throughout marketing circles the revolutionary part of this chapter is that he actually pins down the right size of a group

to make it the most productive he takes a deep look at Gore a fabric innovation company the company is divided into 150 or so person teams that are separated
