in from able to remarkable help your students become expert learners robert massey provides a pathway to help teachers guide their students through the gauntlets of the gifted the underpasses of underachievement and the roadblocks to remarkable on their learning journeys what makes remarkable students remarkable attributes such as resilience curiosity and intelligence may come to mind and we might also add others such as intuition and tenacity but what has helped make them what they are were they born this way or did their remarkabilities emerge during their schooling such questions may make teachers feel uneasy prompting them to reflect on the sometimes limiting scope of what is often labelled as gifted and talented provision in their school robert massey argues however that these remarkabilities are there latent and dormant in many more students than we might at first acknowledge in from able to remarkable robert shares a rich variety of practical cross curricular strategies designed to help teachers unearth and nurture these capabilities and signpost a route to the top for

every learner informed by educational research and evidence from the field of cognitive science the book talks teachers through a wide range of effective teaching and learning techniques all of which are appropriate for use with all pupils and not only with top sets or high attainers robert also shares ideas on how teachers can improve their students abilities to receive respond to and then deliver feedback on both their own work and that of others to complement the feedback process he presents practical methods to help teachers make questioning self review and greater student ownership of their questioning within lessons a staple of day to day classroom interaction venturing beyond the classroom the book also explores approaches to whole school provision for high attaining students and offers some robust stretch and challenge to educational leaders in considering what widespread excellence in education might look like suitable for teachers and gifted and talented coordinators in both primary and secondary schools

sound engineering is one of the fastest growing branches of music production the need for a broad based discussion on the issues constituting the art of sound engineering persists and loses none of its relevance revealing that sound engineering should not be investigated only in the mathematical and physical context musical acoustics or the engineering aspect signal processing and modification publications targeted primarily at musicians are few and far between which is why the mutual understanding for different priorities which effectively concern the same issues faced by the engineer the acoustician and the musician seems to be a complex problem and the main concept explored in this publication this book is intended for musicians or sound directors but also acousticians and sound engineers wishing to learn how the musicians think the monograph is also addressed to musicians who intend to record their material in the studio in the near future but do not

possess knowledge on studio construction studio workflow or the art of recording it seems important to familiarize the musicians with the reality that awaits them on the other side of the glass thus fostering their responsibility for the work jointly produced by them entering the studio and the sound director
